

“It is always a pleasure to attend Nathan’s lectures; they are fascinating, delivered in an amusing and humanistic way, based on unequalled first-hand experience, and express his curiosity and enthusiasm for science. Working during the last 26 years for a world leading company, Intel, he often dealt with cutting edge, innovative technologies, and this turns his lecture into a ‘one of a kind’ event... he sure knows how to tell you a complex story in a simple charming way. Whenever I could, I invited Nathan to speak – and the audience always asked for more...”

– Tchiya Allon, *Technology Training Manager, Applied Materials*

“Nathan is one of the more impressive people I met. He has very deep knowledge of his profession together with a remarkable way to pass his thoughts and ideas to others. I saw Nathan first in a class when he came talking with us on quality assurance and the students expected a very boring session on such a topic...within 5 minutes, we were all fully fascinated listening to every word he said... His very impressive way to attract the audience was a unique experience which I don’t forget after almost 20 years...”

– Oded Sitton, *Project Manager of IT Development & Implementation projects, Intel*

“Nathan is one of the most creative and inspiring people I've met. He is a great lecturer, receiving consistently high feedback, full of new ideas, self-taught and professional in his field. I liked working with Nathan very much, as he's a warm and gentle person, who inspires a good atmosphere.”

– Hilla Kadurie, *Instructors and Solutions manager, Intel University*

“I met Nathan in my first week at Intel when he presented to a group of newly hired employees the history of computing. I was amazed and highly impressed with his great level of knowledge and his ability to "tell the story" just right. Through my years at Intel, I was privileged to work with Nathan in several projects and always enjoyed his innovation, vision, "can do" attitude and professionalism. Over the years I've witnessed Nathan's great contribution to the company.”

– Eran Stern, *Information Systems Manager, Intel*

“I had always enjoyed learning from Nathan, and possibly without intending it, Nathan always had something to teach. He is a masterful communicator with an amazing scope of knowledge. It was really an honor to be associated with him. My advice to all who read this, if you ever have a chance to work around Nathan – do it...”

– Scott Arnold, *Advanced Client Solutions Architect, Intel Corporation*
